

A&M Joinery Pty Ltd

Eco-Sill Timber Door Frame

Environmentally friendly

Saving you money on heating and cooling costs.

FOR EXTERNAL OPEN IN DOOR FRAMES

Eco-Sills are maintenance friendly and are all fully replaceable.
Eco-Sills are anodized with a clear modern-look finish.

Eliminate the need for RP4 Door seals.

A&M Joinery Pty Ltd

Eco-Sill Timber Door Frame

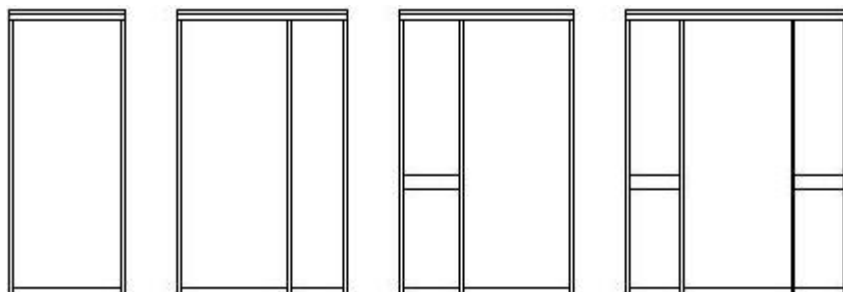

Reduce air loss and draughts
Eliminate slamming doors
Reduce noise penetration

**ROBUST AND DURABLE
NON-SLIP SURFACE**

All frames standard with perimeter door seals around the whole door
Seals are press in for ease of maintenance. They are easily compressed with excellent memory retention.(Available in white or brown)

The Eco-Sill is a high performance product, effective in all types of weather.
Driving rain that may penetrate the door seals is collected and drained to the outside.
The Eco-Sill has been designed to last with its heavy duty aluminium construction providing years of trouble free use.

All Eco-Sill frames come complete with double rebate to suit flywire or security doors.
The Eco-Sill frame is finished with a coat of protective oil and the sill is covered with a protective cover to protect the whole frame during your construction period.

Eco-Sill frame available sizes
2040 x 820 2040 x 870
2040 x 820/870 with glass sidelight or 400 panel
2040 x 1650 (suit pair 820 doors)
All with side flashings fixed to frame
