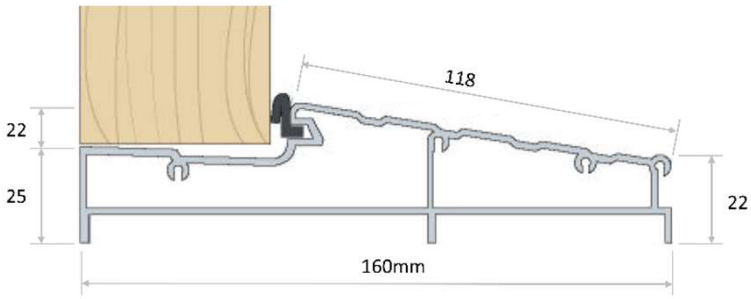
ECO-CILL FRAMES

WITH ALUMINIUM SELF DRAINING CILLS

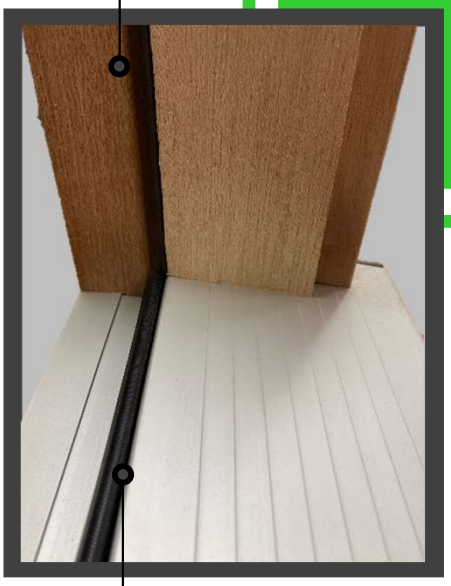


KEY FEATURES:

- Environmentally Friendly
- Saves you Money on heating and cooling costs
- Eliminate the need for RP4 door seals
- Reduce noise penetration
- Eliminate slamming doors
- Reduce air loss and draughts
- Robust and Durable
- Non-Slip Surface

Comes Complete with Double Rebate to suit flyscreen or Security Doors

Anodised with clear modern-look Finish



Seals press in for ease of maintenance. They are easily compressed with excellent memory retention

Standard with Perimeter seals around whole door

- The Eco-Cill is a high performance product, effective in all types of weather.
- Driving rain that may penetrate the door seals is collected and drained to the outside.
- The Eco-Cill has been designed to last with its heavy duty aluminium construction providing years of trouble free use

The Eco-Sill frame is finished with a coat of protective oil and the sill is covered with a protective cover plate to protect the whole frame during your construction period.
